

Safuvest Litepaper

Version 1.0

17th September 2022

Buy & sell digital assets, Borrow stable coins against your digital assets or earn interest by just holding your crypto.

hello@safuvest.com

Introduction

Safuvest is a RealFi platform that will provide a simple, safe and easy to use cryptocurrency app for crypto exchange, savings and lending to users globally.

Safuvest will allow digital asset owners to borrow stable coins instantly against their crypto holdings without selling them, providing efficient and cheap liquidity which is a revolution for crypto holders.

Safuvest just like it's name Safu (Taken from Safe), is secure and supports multi-chain cryptocurrencies like the new ETH Pos Chain, BSC, TRX and Cardano Networks.

Problems

Ever since the dotcom era started, the internet has transformed the world into a global village with communication and transfer of value happening across the world in just minutes.

The growth of blockchain and cryptocurrency technology is happening exponentially with the largest user base in this growth being millennials and the gen-z generation.

Traditional finance is slow and costly when compared to the capabilities blockchain and DeFi.

The blockchain-based fintech ecosystem is having an advantage over the banking solutions that are built on legacy systems who are battling with slow and cumbersome onboarding processes, and are not accessible to everybody.

Safuvest Features

Safuvest is building the infrastructure to harness the power of digital assets using blockchain technology and increase the adoption of digital assets around the globe.

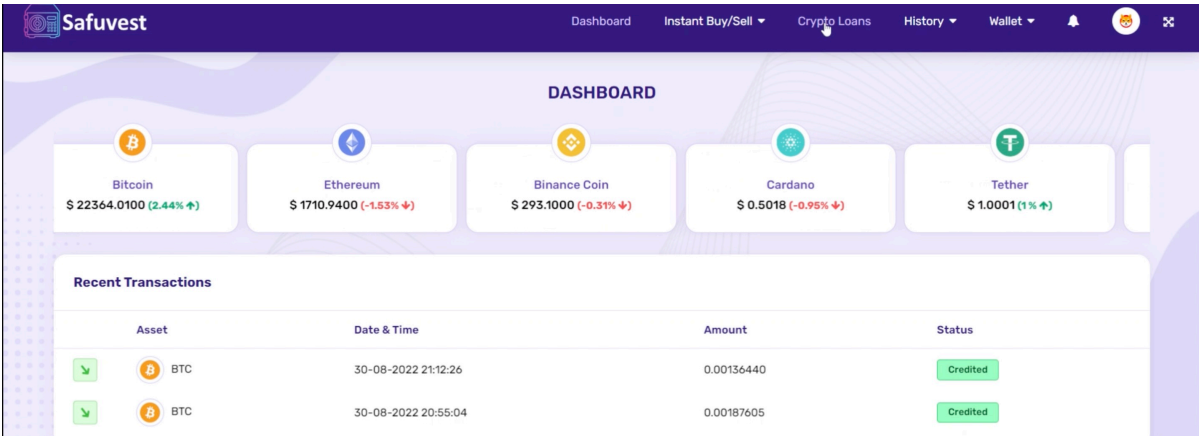

Safuvest will go a long way in helping the unbanked and less informed about cryptocurrency and blockchain technology exchange value, trade and hedge against inflation by easily utilizing the power of blockchain technology but in a simple and easy to use manner.

Safuvest will allow users to use digital assets as collateral to get a loan in USD or in other approved Digital assets and in the future, lend their digital assets to earn interest.

We are taking it up a notch higher to introduce \$SAFV token, the utility token of Safuvest platform, that will be used to pay for transaction fees.

UI Preview

Safuvest app will feature a sleek, easy to use interface that would lower the barrier of adoption to non crypto savvy users while also retaining the security and immutability of the blockchain.

Revenue Model

Safuvest revenue model will come from the following ways:

Trade Fees: Safuvest will charge a fixed fee per asset trade, other variations like paying for fees with the \$SAFV token will later be introduced.

Withdrawal Fees: Safuvest may charge a very small fee for token withdrawals.

Listing Fee: We will select and list the most innovative cryptos and there may be a fee associated with those listings.

Lending Fee: There may be a fee or interest for users looking to lend or borrow using their digital assets.

Safuvest Token

Safuvest will issue our utility token, called the SAFV token.

A strict limit of 100 million SAFV tokens will be created, never to be increased.

SAFV will run natively on the Binance Smartchain with the BEP20 Standard.
